汽车内外饰表面激光科技

Auto Int&Ext Surface Laser Technology

报告人：徐涌
Reporter: Allen

个人介绍:

徐涌，字逸人，号太白逸人。

职业介绍:

14年汽车及产品外观纹理开发经验；

善于从造型、情感化设计、纹理趋势的角度，来解析纹理对提升产品设计和造型感知质量的重要性；

同济大学、上海交大、江苏大学、中南大学等高校客座讲师。

有没有一种工艺，让塑料变得不像塑料，让塑料变得高级，
并且是低成本，可复制，可以大规模量产的？
达成降本增效！

Is there a kind of automobile interior and exterior decoration technology, Make plastic doesn't look like plastic, Make plastic more elegant ?
And low cost, replicable, mass production?
Reduce cost and increase revenue.

激光碳纤维、拉丝纹理大量运用，提升品质感和科技感

**Laser carbon fiber and hairline texture are widely used to enhance
the sense of perceived quality and technology.**

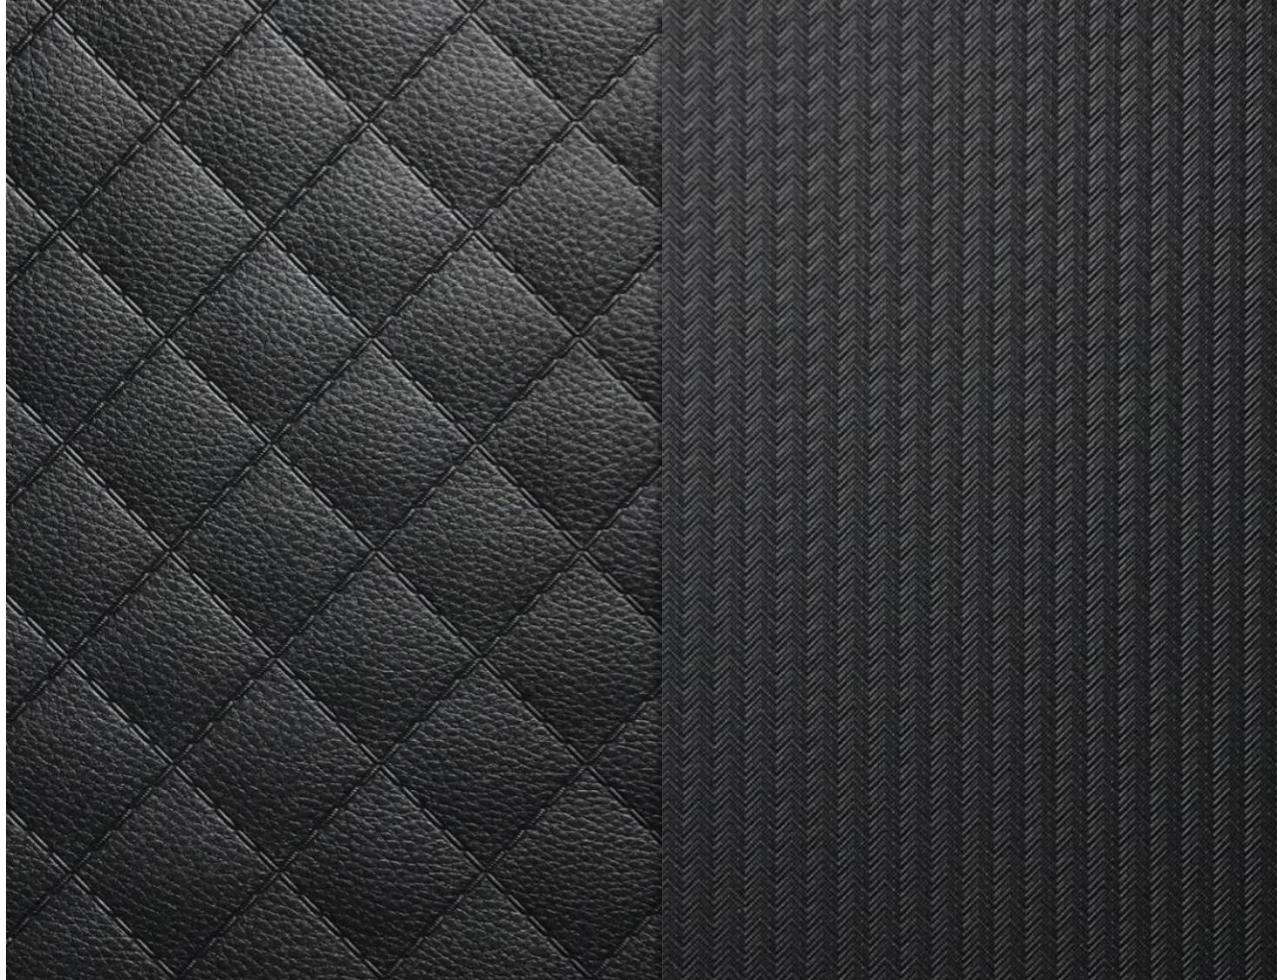

激光碳纤维、钻石纹、拉丝纹理大量运用，提升运动感与科技感

Laser carbon fiber, diamond cutting and drawing texture are widely used
to enhance the sense of motion and technology.

激光真皮、缝线、混纺编织纹理的运用，提升软触和品质感

Application of laser weave texture of leather, suture, blended knitting, improve soft touch and quality

目 录 Contents

- 1. 天至尊及全球激光纹理联盟简介
Brief Introduction of TZZ and Global Laser Group(GLG)
- 2. 纹理工艺的革命和激光3D纹理独特性
Revolution of Texture Technology and Uniqueness of Laser 3D Texture
- 3. 树立品牌辨识度，提升感官质量
Establish Brand Identity and Improve Perceived Quality
- 4. 3C家电汽车纹理发展趋势和客户案例
Texture Development Trends of 3C, Electric appliance and Auto, Application Cases

PART 01

天至尊及全球激光纹理联盟简介

Brief Introduction of TZZ and Global Laser
Group(GLG)

公司简介

Company Brief Profile

天至尊激光3D纹理公司，是全球最专业的汽车内外饰和电子产品外观纹理研发、设计、3D激光加工的现代化高科技纹理企业之一。 Suzhou TZZ is one of the most professional high-tech companies in automobile interior & exterior texture and electronics appearance texture engraving, which specializes in texture research, design and laser 3D machining.

3D激光雕刻展示了一个工艺的创新和成功，同时标志着TZZ迈向了全球现代化纹理的新时代。

3D Laser skills demonstrate the innovative drive and the success of a new technology and also have marked TZZ's path toward modern worldwide surfacing of new area.

Design Center

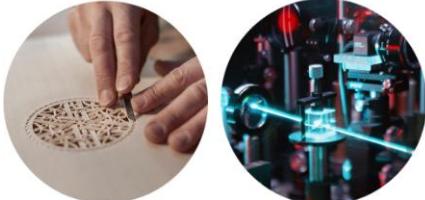

设计中心

Modernized Industry 4.0 TZZ- GF Laser Automatic Processing Plant

现代化工业4.0 天至尊-GF激光自动化加工工厂

德国KRUETH镍模表面处理中国技术中心 Krueth Nickel Shell Surface Treatment (China)Technology Center

现代化工业与传统技术并存
Coexistence of modern industry and traditional technology

Traditional Etching Technology Plant

传统技术蚀刻工厂

企业优势

Company Advantage

优势一 No. 1

引进最先进的设备，23台激光设备

五轴联动激光雕刻设备

4米激光加工机台，加工行程达到4米

最细激光源加工精度达到 $20\mu\text{m}$

对于纹理品质进行数字化控制

避免模具的拼接轨迹，具备稳定一流的品质。

Most advanced equipment, 23 sets of Swiss GF laser solution.

5-axis laser machining.

The longest machining length is 4m.

The smallest laser accuracy is $20\mu\text{m}$.

Digital and automation control.

Best stable quality without any matching line.

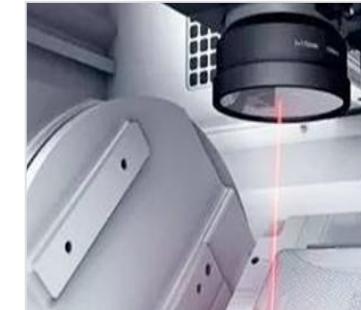

优势二 No.2

成立纹理设计研发中心

提供量身定制的个性化的独一无二的，具有品牌价值的专属纹理设计

Set up the Texture Design R&D center. Create exclusive and own brand textures.

优势三 No.3

全球化领先的工艺

3D激光雕刻技术

3D激光雕刻+蚀刻相结合技术

高速转印蚀刻技术

满足汽车行业对内饰生产工艺更新迭代的要求。

The most advanced technology in global area of 3D-Laser Engraving, Laser Engraving & Etching,

Fast Transfer Etching.

Meet auto interior market rapidly changing requirements.

企业奖项

Corporate Awards

2020年国际CMF设计奖—纹理公司唯一获奖单位

International CMF Design Award of 2019 - The Only Winner of Texture Company.

2020年中国模具有工业协会 重点骨干企业——纹理公司唯一获奖单位

Key Backbone Enterprise of China Mould Industry Association of 2020 — The Only Winner of Texture Company.

2019年国际CMF设计奖 至尊金奖—纹理公司唯一获奖单位

Golden Medal of International CMF Design Award of 2019 - The Only Winner of Texture Company.

2018年中国模具有工业协会 重点骨干企业—纹理公司唯一获奖单位

Key Backbone Enterprise of China Mould Industry Association of 2018- The Only Winner of Texture Company.

激光设备量产能力 Laser Graining Capability

激光设备产能 (全球最多) :
Laser Capability(The most worldwide):

23台瑞士GF五轴激光雕刻机设备。
23 sets of Swiss GF 5 axis laser machines.

P4000U, 4米加工行程: 9台
P4000U, machining length 4m: 9 sets.

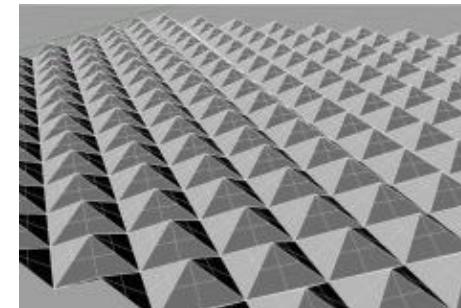

P1200U, 1.2米加工行程:4台
P1200U, machining length 1.2m:4 sets.

P1000U, 1米加工行程: 6台
P1000U, machining length 1m:6 sets.

P600U, 0.6米加工行程: 4台
P600U, machining length 0.6m:4 sets.

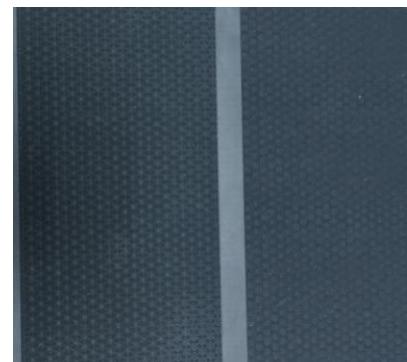

一、设计精细纹理，提升品牌价值

Customize design textures to specifically enhance brand value.

二、前期三维效果图制作

3D renderings making

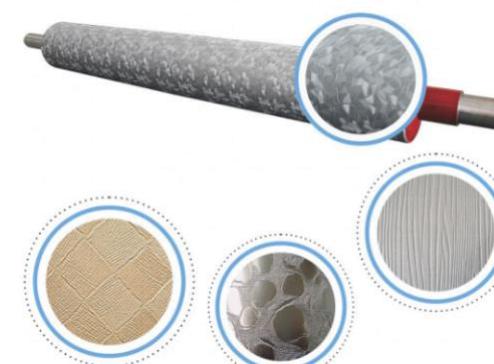

三、快速打样RTP

Rapid texturing prototype

四、整车包覆技术

Complete vehicle wrapping technology

五、滚筒表皮开发

Embossing Roller for car leather

铝件镭雕流程

Laser Engraving Process for Aluminum Parts

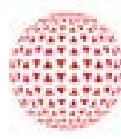

副仪表板快速样件 -- 铝件
Console RP--aluminum parts

3D激光雕刻加工
Laser engraving

激光纹理雕刻铝模后样车效果
Laser engraving RP texture and
installed in show car

数字雕刻技术的全球团队

TZZ global cooperation network
Global team of digital engraving technology

CustomEtch 美国

CustomEtch USA

Kruth 德国

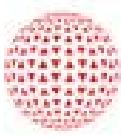

Kruth Germany

天至尊 中国

TZZ China

天至尊——全球性目标 TZZ——Worldwide mission

联盟企业纹理共享-全球范围内使用相同的加工参数。

One grain-passport for all partner companies, identically parameters far all locations, world wide.

完美的地域优势-纹理研发+设计在全球完成。

Perfect performance locally, grain-development + texture-mappings finalized by all partners.

全球加工一致性-相同的模具，相同的加工参数。

Global performance identically, identical texture-mapping by identical molds.

全球生产需求
Demands of an global production

纹理研发与设计共同完成
Grain_development+texture-mapping made+designed by Kruth、CustomEtch and TZZ

纹理技术与纹理品质全球一致性
Grain-technology+Grain-quality worldwide made identically

全球性的技术转移 Globale technology-transfer

我们的世界性语言：信息交换
our worldwide language:exchange of information

- 纹理+数字加工信息完全传递
Grain+Processinformation pass totally
- 持续明确的工艺流程
Continuoues defined process-flow
- 考虑条件+公司结构
In consideration of condition+company structure
- 跨越语言障碍：视频会议+图片信息
Crossing language barriers:
videoconference+information by picture
- 定期项目会议/监控+现场的支持
Regulary projectmeetings/monitoring+surport on-site

PART 02

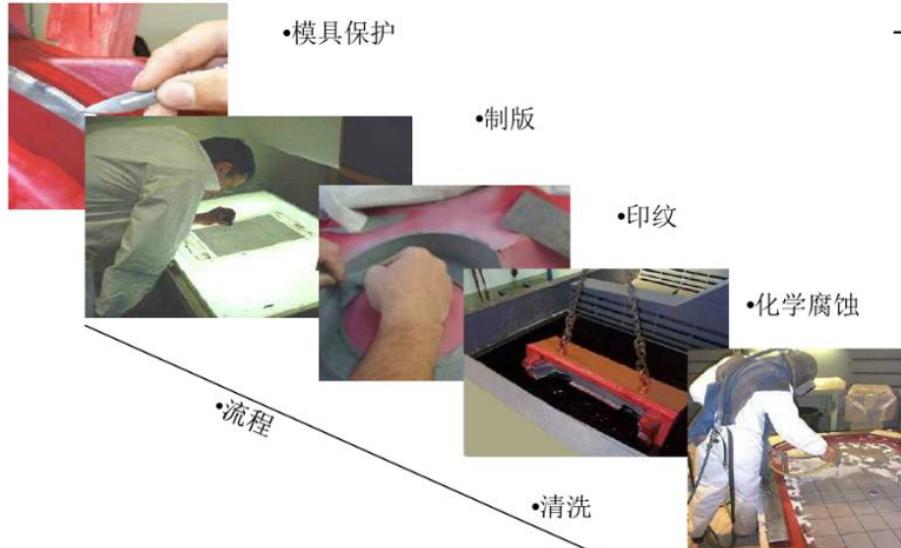

纹理工艺的革命和激光3D纹理独特性

**Revolution of Texture Technology and
Uniqueness of Laser 3D Texture**

革命 Revolution

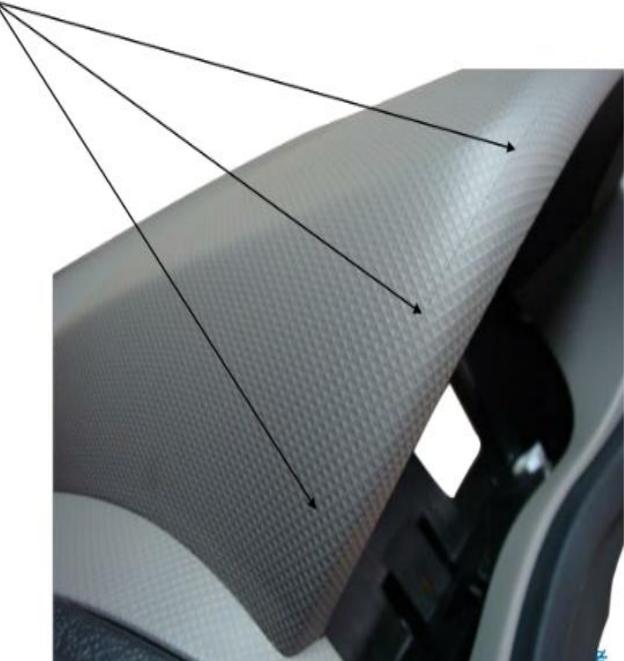

流程

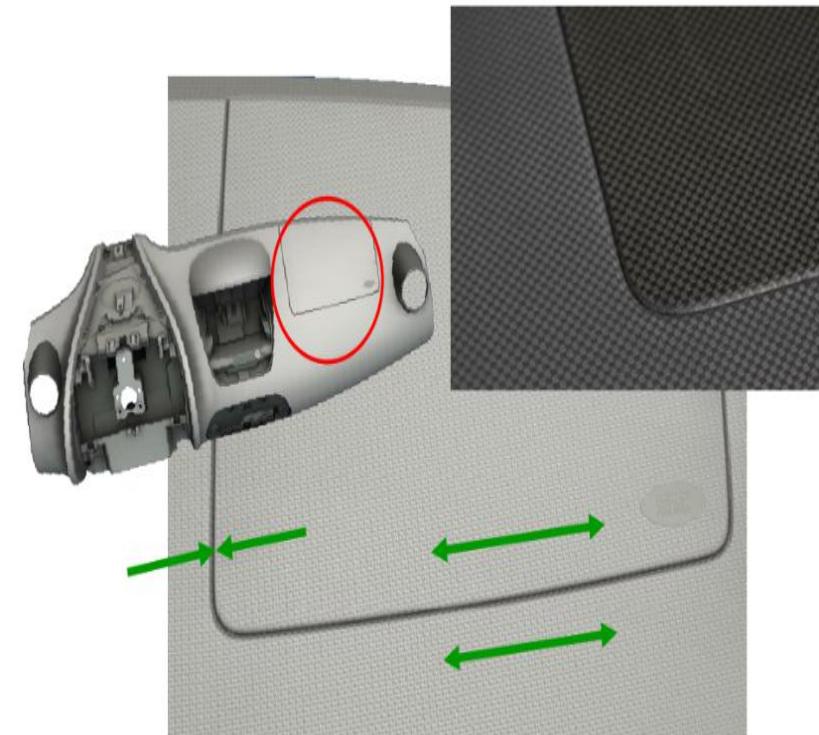

蚀刻VS激光
Etching VS Laser Texturing

•Split line

•接缝

Split line
《手工生拼接品》

Incoherent texture
纹理不够连贯

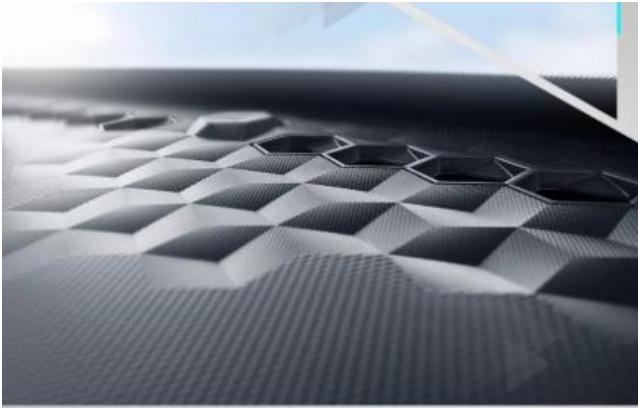

传统化学蚀刻与激光雕刻工艺的对比

Comparison between Traditional Etching and Laser Engraving

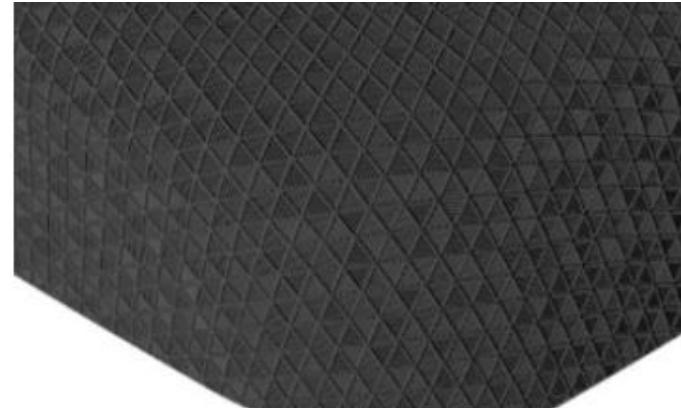

激光雕刻

软件排图+激光雕刻

Laser Engraving
Software mapping
+ Laser engraving

激光雕刻3D几何纹理，呈现出很强立体感的视觉效果
Laser engraving 3D geometric texture presents strong stereoscopic visual effect.

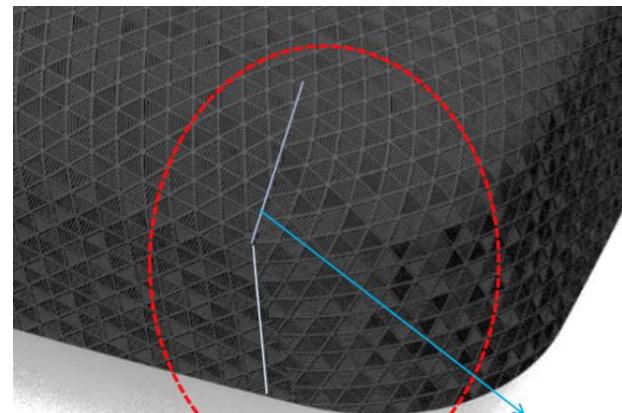

蚀刻纹理会产生拼接印，纹理不够连贯，而激光3D纹理，过渡更自然
Traditional etching may produce connection mark, and incoherent texture, but 3D laser texture can splice more naturally.

激光雕刻3D纹理，是在自由曲面表面，具有无限设计加工可能性
Laser engraving 3D texture can be on free-form surface, with infinite design and machining possibility.

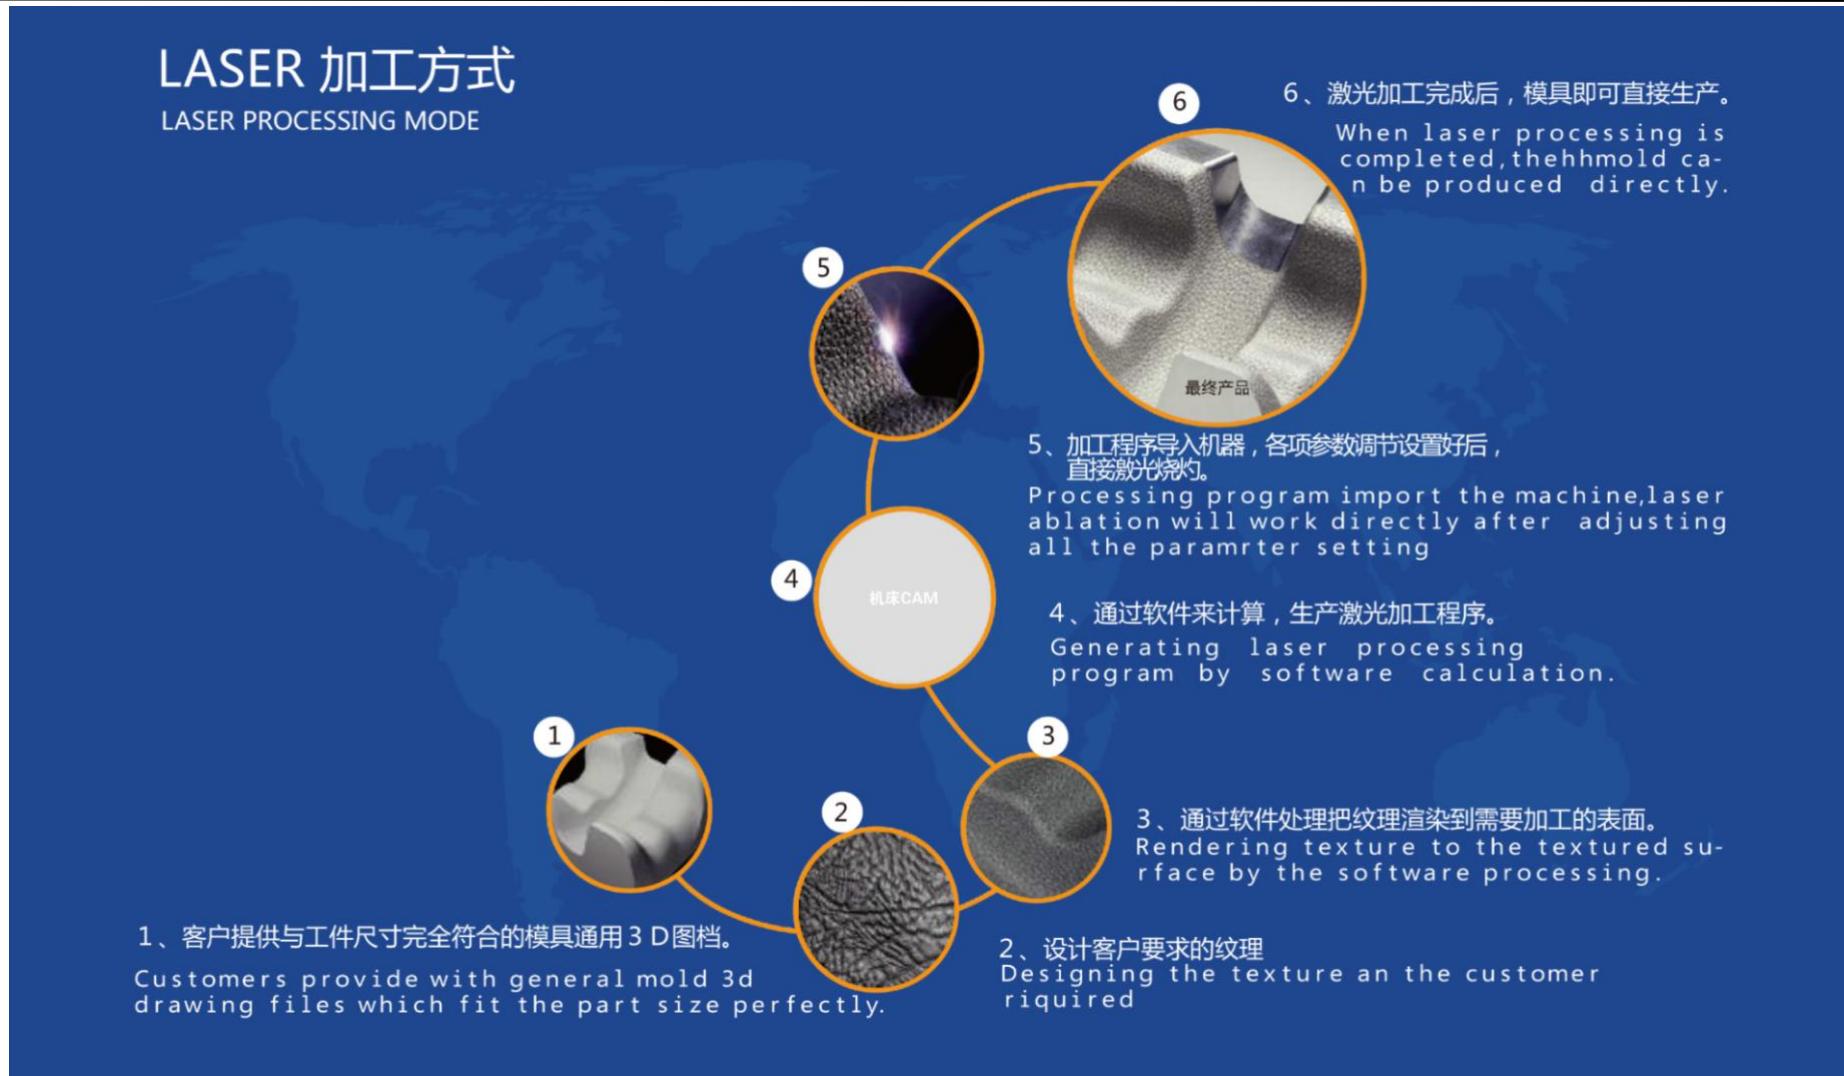

传统蚀刻

手工贴菲林+药水腐蚀
Traditional Etching
Hand-pasted Film + Medical Etching

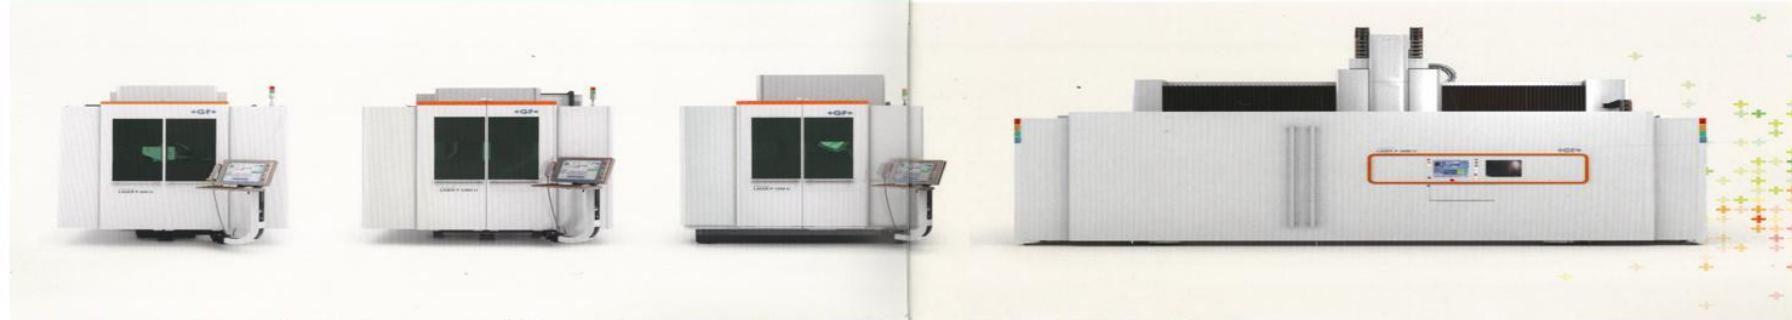

参数化设计与数字化加工无缝对接，完美呈现纹理效果

Parametric design and digital processing seamlessly dock, perfectly presenting texture effect

激光纹理优势

Laser Texture Advantages

表面纹理视觉触感更加逼真，体现活力、科技、品质、运动、时尚、未来、金属等。

Surface texture visual touch is more realistic, reflecting vitality, science and technology, quality, sports, fashion, future, metal and so on.

优势五

环保工艺，无化学品使用
Environment friendly

无限的设计自由
Infinite Design Freedom

提升质感去塑化
Improving texture and removing plastics

提高品牌可视性
Improving Brand Visibility

高度自动化
Highly automated

优势四

无视钢材性，可以加工各种金属
Engraving all kinds of metals.

优势三

全数字化，可复制性与一致性
Fully digital, reproducible and consistent.

优势二

自由曲面的表面，无限设计加工可能性
Free Surface, Infinite Design and Machining Possibility.

优势一

侧边花纹深度精准到1μm左右，减花效果更完美，深度更准确，更均匀，
模具拉花几率大大降低
The accuracy of side texture is about 1μm, the effect of reducing pattern is more perfect, the depth is more accurate and evenly, and the probability of mould scratch are greatly reduced.

激光皮纹&腐蚀皮纹&贴膜片&喷漆 单车成本对比

Laser Grain&Etching&INS&Painting CPV Comparison

前门饰条（一侧）： 后门饰条（一侧）：

- 450*67*38mm
- PC/ABS
- 0.019m²
- 64g
- 674*83*38mm
- PC/ABS
- 0.027m²
- 81g

No.	工艺类型 Process Type	预估单车 成本 Estimated CPV	预估投资费 Estimated B-Invest	激光皮纹取代其它工艺 降低投资费 Estimated B-Invest Laser Texture Replace Other Technique
1	激光皮纹 Laser Texture	0.30 RMB	15万元 150,000 RMB	-
2	腐蚀皮纹 Chemical Etching	0.08 RMB	4万元 40,000 RMB	增加11万元↑ +110,000 RMB↑
3	IMD&INS Patch Film	200 RMB	1亿元 100,000,000 RMB	减少9985万元↓ -99,850,000 RMB↓
4	喷漆 Painting	50 RMB	2500万元 25,000,000 RMB	减少2485万元↓ -24,850,000 RMB↓

预估计算：
单车4个门饰条，
10年量产周期合计50万台车。
价格只是预估，不作为实际报价，仅作为
不同工艺的成本比较分析。

Budget Estimates:
Four door decorative strip.
10-year production cycle totals
500,000 vehicles.
The price is only as estimate, not as
actual quotation, just as comparative
analysis of the costs of different
techniques.

Etching < Laser Texturing < Painting < Electroplate < IMD&IML&INS < TOM
Laser Texture ≈ 1/1000 INS Patch Film

PART 03

树立品牌辨识度，提升感官质量

Create Brand Recognition and Improve
Perceived Quality

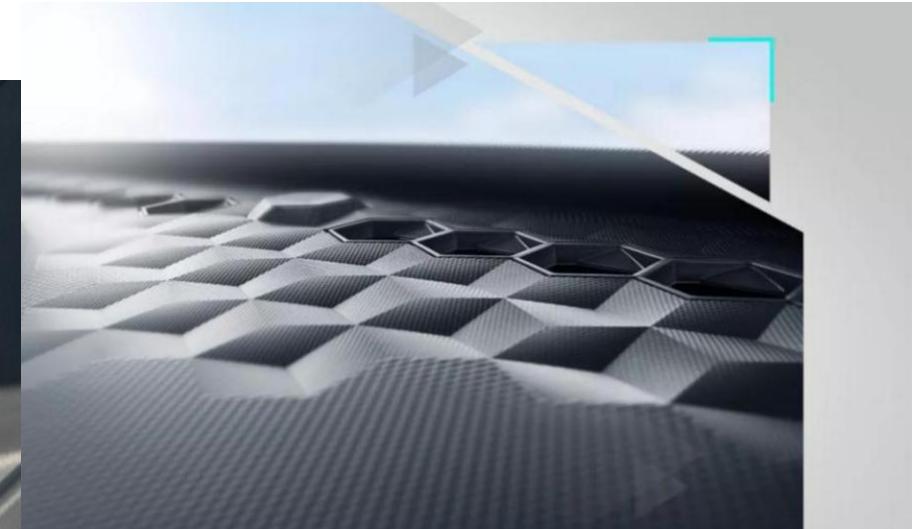

情绪化设计，通过独具匠心的纹理设计，改善给人的感受和氛围

Emotional design, change the feeling and atmosphere to people by texture decoration.

从纹理和细节层面，树立品牌辨识度，实现视觉营销

Establishing Brand Identity from Texture and Detail. Realise Visual Marketing.

当点线刻画出
想象的形状 When dotted lines depict
imaginary shapes.

创造明亮舒适的内饰很有必要，大大提升了产品的纯净感、科技感。

汽车纹理不再浮于表面，可以是更有触觉感受的立体花纹。

各大主机厂根据品牌需要开发出自己专属独特的纹理样式，从细节层面就树立品牌辨识度。

It is necessary to create bright and comfortable interior, which greatly improves the purity and technology feeling of products.

Vehicle texture is no longer floating on the surface, it can be a more tactile three-dimensional pattern.

Major auto OEM develop their own unique texture style according to the needs of the brand, and establish brand recognition from the level of detail.

品质将越来越被重视，胜过造型感知力，创新与科技纹理的重要性与日俱增

Quality will be paid more and more attention than the perception of shape.

The Importance of Innovation and Texture of Science and Technology is increasing.

**科技纹理、渐变纹理，纹理与色彩面料的有机创新结合，
提升内饰精致感，层次感，显示设计的精妙和别具一格。**

Technological texture, gradient texture, texture and color fabrics are combined with organic innovation.

Enhance the delicacy of interior decoration, layering, showing the delicacy and distinctiveness of the design.

INTERNATIONAL CMF DESIGN AWARD ORGANIZING COMMITTEE

纹理设计开发是细分领域，纹理费用占产品研发支出微小的比例，

但是对产品设计感知质量的提升，影响极其重要！

可以极大提升产品感知质量，让产品看起来更高级，更精致，更赏心悦目！

Texture design and development is a subdivision field, and texture cost accounts for a small proportion of products' R&D expenditure.

But it is very important to improve the perception quality of the whole product!

It can improve the perception quality of the products, make the products seems much more elegant and sophisticated, gladden the heart and please the eyes.

CMF之歌 作者：徐逸人

色彩材质和纹理，
相辅相成不分离。
不拘一格焕新颜，
方能精美又绝伦。
